

Control the complete system through the PoolSync® App

PoolSync
READY!

PoolSync® SYSTEM

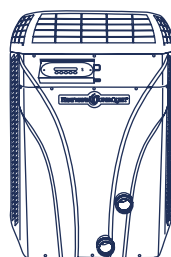

Ready to Automate your Pool's Features?

The PoolSync® System provides simple control for a great price.

Control all basic pool functions right through your AquaCal® heat pump and the PoolSync® App.

California residents visit aquacal.com for Proposition 65 information.

Heat Pump Controller

AquaCal's internal advanced microprocessor control connects and communicates with the other equipment, eliminating the need for costly, bulky external controllers.

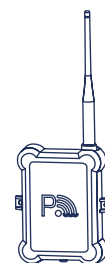

PoolSync® Relay Center

Relay Center holds up to 4 relays to control lights, add pumps or other water features on your pool.

*Additional purchase of expansion board required

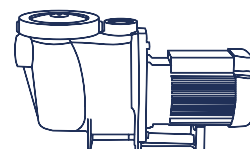

Part Number ECA0507

PoolSync® WiFi Controller

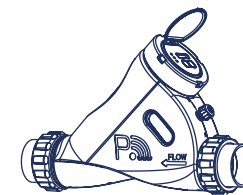

This simple WiFi Controller connects the equipment to the internet for control through the PoolSync App.

Part Number ECP0343

Pool Filter Pump Control

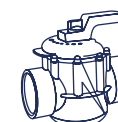

No external timeclock or controller necessary to control the filter pump. Ability to control single, double and variable speed pumps. Compatible with most popular brands.

ChlorSync® Salt Chlorine Generator

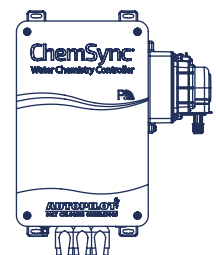

Automatically generate chlorine right in the pool's plumbing to reduce maintenance and keep pool water sanitized.

Multiple models available

Valve Actuators

Control up to 3 valve actuators to change pool/spa settings and features on the fly.

ChemSync® Water Chemistry Controller

Combine this unit with a ChlorSync System for perfectly balanced pool water. Automatically measure and adjust pH and ORP.

Part Number ECA0486
