

PoolSync™

WiFi Controller

Effortlessly control PoolSync™ Ready equipment through the simple phone app. Whether at home or on the road, always be in sync with your pool.

With the PoolSync WiFi Controller and App, you can adjust your ChlorSync® output and your AquaCal® heat pump's settings from the palm of your hand.

Part number: ECP0343

Don't have an HP9 controller? You can easily upgrade your existing AquaCal heat pump to work with the PoolSync.

Upgrade kits: STK0225 with 60" cable or STK0226 with 100' cable.

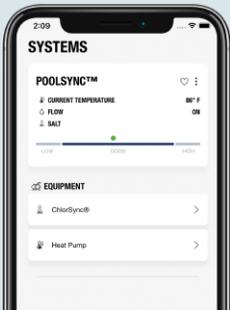

If you see the PoolSync™ Ready logo on a piece of equipment, then it is compatible with this simple control system.

PoolSync™

WiFi Controller

Get your pool in **SYNC!**
Get simple control for a great price!

DASHBOARD

Quickly view your system status on a concise dashboard
