PoolSync READY!

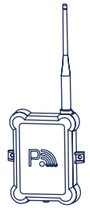
Ready to Automate your Pool's Features?

The PoolSync® System provides simple control for a great price.

Control all basic pool functions right through your AquaCal® heat pump and the PoolSync® App.

California residents visit aquacal.com for Proposition 65 information.
*Applies to units equipped with advanced function digital controller.

Visit aquacal.com/poolsync for more information

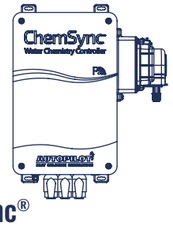


PoolSync® WiFi Controller

This simple WiFi Controller connects the equipment to the internet for control through the PoolSync® App.

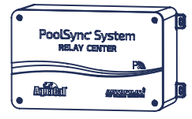
ChlorSync® Salt Chlorine Generator

Automatically generate chlorine right in the pool's plumbing to reduce maintenance and keep pool water sanitized.



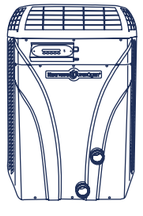
ChemSync® Water Chemistry Controller

Combine this unit with a ChlorSync® System for perfectly balanced pool water. Automatically measure and adjust pH and ORP.



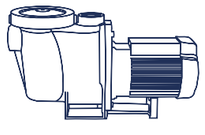
PoolSync® Relay Center

Relay Center holds up to 6 relays* and 4 valve actuators* to control pool/spa/landscape lights, add pumps or other water features on your pool*.



Heat Pump Controller

AquaCal's internal advanced microprocessor control connects and communicates with the other equipment, eliminating the need for costly, bulky external controllers.



Pool Filter Pump Control

No external timeclock or controller necessary to control the filter pump. Ability to control single, double and variable speed pumps*.

Valve Actuators

Control up to 3 valve actuators to change pool/spa settings and features on the fly*.
